FOR IMMEDIATE RELEASE**

## **SuperbServers.Net – Affordable, Quality Dedicated Servers Now Online**

**Vancouver, BC – February 11, 2003**

[Superb Internet Corporation](#), a world-leading provider of fully managed web hosting solutions, along with the unveiling of its new DCA2 data centre in McLean, Virginia, is pleased to announce that it has successfully launched the latest expansion of its hosting solutions to incorporate [SuperbServers.Net](#), the latest evolution in affordable, quality dedicated hosting.

SuperbServers.Net introduced its flagship offering, the Superb Lite Server, providing the customer their own ultra-fast, power-packed dedicated server, 512MB of RAM (upgradeable to 1GB), a huge 60GB hard drive, full root access and a whopping 500GB/m of value-priced traffic included for only \$99 per month and its new Value CoLo services offering 500GB/m of colocation services for only \$79 per month.

“Our new hosting service delivers to the marketplace affordable yet quality connectivity at the heart of the Internet (MAE-East). While the marketplace has been proliferated with cheap hosting providers offering dedicated servers for very low pricing, SuperbServers is the first hosting provider to offer inexpensive dedicated servers housed in a data facility connected to multiple Tier 1 backbones.” proclaims Haralds Jass, President and CEO. “We believe that while to date many have not considered where their server will be located, going forward discriminating customers will determine that it is more important where you locate than who is simply giving the cheapest price point.”

Best of all, SuperbServers.Net is backed by up by a state-of-the-art carrier class network operations and data centre, located in prestigious Tyson's Corner, McLean, Virginia. The new DCA2 Data Centre is over 12,500 sq. ft. and is staffed by highly experienced Systems & Network Administrators 24 hours a day, 365 days a year. It features top-of-the-line security, quad redundant power system, including UPS, generators, and multiple automatic layer 3 bypass switches, Halon & pre-action fire suppression systems, and hosting in open racks, locked cabinets, cages, as well as a military-grade "tempest" room (interference shielded metal room).

### **About Superb Internet Corp.**

Since 1996, Superb Internet has been consistently rated as one of the very best web hosts by all web host rating agencies, such as Web Hosting Magazine, in all areas, especially customer support and reseller services. Superb Internet provides a complete range of managed web hosting services, from virtual hosting through to high-volume, mission-critical dedicated service solutions. Superb's core focus is customer service, and continuous service improvement, as a part of its commitment to staying "**Ahead of the Rest®**".

Superb Internet has offices and 24-hour/365-day operations in Washington, DC, Vancouver, BC, and New Delhi, India, and serves customers in over 150 countries worldwide.
