

Buy One Dedicated Hosting and Get the Second One Free; Black Friday until Cyber Monday at Superb Internet

Starting Friday the 25th and running until Cyber Monday, Superb Internet will be selling dedicated hosting for \$39/ month, and they will be giving you a second server for free. Customers can enjoy the buy one get one free dedicated server special all weekend, giving them more time for football, family and friends.

Seattle, WA ([PRWEB](#)) November 25, 2011 -- Shoppers won't have to stand in line at superb.net this Black Friday or Cyber Monday. The online dedicated server hosting company has spent the year building inventory for a huge Cyber Monday sale. Shoppers seeking After Thanksgiving Day Sales can wow their entire family and friends with unique holiday gifts, but Superb Internet believes businesses deserve discounts as well.

"Why should retail stores be the only ones who participate in Black Friday and Cyber Monday? This is why we thought it would be nice to have our online special run all weekend, so people could spend time with their families instead of sitting in long lines," stated Haralds Jass, CEO of Superb Internet.

Starting Friday the 25th and running through Cyber Monday, Superb Internet will be selling their Pentium4 [dedicated hosting](#) for \$39/ month, and they will be giving buyers a second one for free. Customers can enjoy the buy one get one free dedicated server special all weekend, giving them more time for football, family and friends. The promo code is: 7468

Superb will also be giving away their billing platform for free for all customers who buy one of their [White Label Reseller Hosting](#) plans. For Cyber Monday, the innovative reseller program includes a free billing platform, runs off Linux and cPanel, allows for unlimited customer accounts, and is 100% customer branded. Plans start at \$29/month and include 50GB disk space and 5TB of transfer.

The White Label Reseller program is truly revolutionary with Managed Billing; Superb boasts that they will go as far as calling their resellers' customers for them for as little as \$2/ month per client. People who resell hosting are familiar with the agony of billing all of their clients month-to-month, often having to put up with countless phone calls and numerous billing-related emails; with Black Friday and Cyber Monday coming, this can be a fear of the past.

About Superb Internet
