

Superb Internet Launching New Xeon E5-2600 Series Servers

One of the First to Market with New Intel E5 Powered Servers.

Honolulu, Hawaii ([PRWEB](#)) June 12, 2012 -- Superb Internet Corporation (www.superb.net), one of the most well established and foremost hosting and dedicated server provider in the web industry, is one of the first in the market to offer the [new Intel Xeon E5-2600 series](#) powered enterprise class servers.

“According to Cisco, we can expect to global traffic to increase by over 30% in the next few years. These new servers will better position us to offer the best that is out there. It is all part of being Ahead of the Rest®. We are truly excited to be one of the first to market with these powerful servers,” says Richard Norwood, Marketing Manager.

In 2010, Intel touted the new Xeon as the industry standard for speed, security and performance. Now the processor powerhouse has released a new series that is redefining that standard, the Intel Xeon E5-2600 product family. According to Intel’s tests, these processors out performed the Xeon 5600 series by as much as 67%. Needless to say, Superb Internet’s new E5-2600 series server line stands to be some of the most powerful and efficient option in the market. These processors offer a whole host of improvements, including Intel’s Turbo Boost technology 2.0, which allows for the processor to increase frequency at the request of the operating system, and Intel DCM or data center manager make these servers ideal for many enterprise level hosting needs. For added performance, Superb Internet has built their dedicated platforms utilizing only Supermicro hardware. These and many other features will be necessary to be able to handle the increase in the number connected device that is projected over the next three years, which projects that there will be over 15 billion internet connected devices. This will most definitely position Superb Internet for the rising demand for web hosting services.

It is clear that Superb is committed to be Ahead of the Rest. With the new E5 offering, they have ensured their product line will continue to be one of the best in the industry.
